BHARAT AI - Building AI in India

What we did ?

- Date: March 16, 2024
- Time: 10:00 AM - 4:00 PM IST
- Overview: The event, titled "BHARAT AI - Building AI in India," was organized to explore the advancements and opportunities in AI technology within India. It included keynote speeches, panel discussions, and interactive Q&A sessions.
- Activities:
- 10:00 AM - 10:30 AM: Opening Remarks and Welcome Address
- 10:30 AM - 12:00 PM: Keynote Sessions on New Age AI Solutions
- 12:00 PM - 1:00 PM: Panel Discussion on India's Stand on AI Innovation
- 1:00 PM - 2:00 PM: Lunch Break
- 2:00 PM - 3:30 PM: Workshops and Breakout Sessions on AI Potential in India
- 3:30 PM - 4:00 PM: Closing Remarks and Future Directions

Objective of the Event

The primary objective of the "BHARAT AI" event was to highlight India's growing role in the global AI landscape. The event aimed to:

- Discuss the latest advancements in AI technologies and their applications in various sectors within India.
- Examine the opportunities and challenges associated with AI innovation in India.
- Foster collaboration between industry leaders, academicians, and policymakers to promote AI research and development in India.
- Encourage the adoption of AI solutions that are tailored to India's unique socio-economic challenges.

Additional Details

- Venue: The event was conducted at the Indian Institute of Technology, Delhi, in an offline mode.
- Duration: The event spanned 6 hours, including breaks and networking sessions.
- Mode of Conduct: Offline
- Additional Information:
- The event was organized by the Department of Electronics and Information Technology in collaboration with several leading tech companies.
- The event featured interactive workshops where participants could engage with AI tools and platforms.

Speaker and Participant Details

- Number of Participants: Approximately 200 participants attended the event.
- Number of Registrations: Over 500 registrations were received, indicating a high level of interest.
- Speakers:
- The event featured 5 keynote speakers, including prominent AI researchers, industry experts, and government officials.
- Each speaker brought a unique perspective, focusing on various aspects of AI innovation, from technical advancements to policy implications.

Key Outcomes of the Event

- **Insights into AI Trends:** The event provided deep insights into the latest trends in AI, particularly in how AI is being integrated into critical sectors like healthcare, agriculture, and smart cities in India.
- **Identification of Opportunities:** The discussions highlighted numerous opportunities for AI innovation in India, especially in addressing local challenges such as improving agricultural productivity, enhancing healthcare access, and developing smart infrastructure.
- **Networking and Collaboration:** The event served as a platform for networking, facilitating collaboration between different stakeholders, including academic institutions, tech companies, and government bodies.
- **Awareness and Education:** The event successfully raised awareness about the potential of AI in India and educated participants on the ethical considerations and best practices in AI deployment.
- **Actionable Recommendations:** Key recommendations were made for policymakers and industry leaders to create a more supportive environment for AI innovation, including suggestions for improving AI education, research funding, and creating regulatory frameworks that encourage innovation while ensuring ethical use.
